Education

Vellore Institute of Technology, Bhopal

Bachelor of Technology in Computer Science, Spec. in AI/ML

Sep. 2020 – May 2024

Bhopal

Bright Day School

Higher Secondary in Science, 12th grade

April 2019 – May 2020

Vadodara

Experience

SkyBug Technologies

Machine Learning Intern

Dec. 2023 – Jan. 2024

Remote

- Developed and evaluated machine learning models for NLP sentiment analysis and customer churn prediction, achieving ~90% accuracy/F1-score on IMDB movie reviews and ~80-85% test accuracy on bank churn classification.
- Implemented end-to-end ML pipelines including data preprocessing, feature encoding, feature engineering, model training, and evaluation on both unstructured text and structured tabular data.
- Validated model performance using precision, recall, F1-score, confusion matrices, and feature importance analysis to ensure reliable and interpretable predictions.

Projects

ResumeMatch AI | Python, Streamlit, Groq, Sentence-Transformers, ChromaDB

Dec. 2025

- Developed an AI-powered resume-job description matching system using sentence embeddings and cosine similarity to compute semantic fit scores.
- Integrated Llama-3.3-70B via the Groq API to generate tailored resume bullet points and personalized cold emails, with robust fallback handling for rate limits and failures.
- Deployed a production-ready Streamlit application with real-time analysis, downloadable application kits, and resilient error handling.

SEO-Scribe | Python, Ollama, BeautifulSoup, Mistral

March 2025

- Designed a multi-agent AI system using Python, Ollama, and Mistral to automate SEO-optimized blog generation from scraped web content and trending topics.
- Implemented an end-to-end pipeline covering web scraping, content planning, long-form blog generation, SEO optimization, and proofreading with minimal manual input.
- Automated structured content exports in Markdown, PDF, and TXT formats, enabling reusable, production-style content workflows.

Doc-Talk AI | Streamlit, LangChain, Google Gemini (Generative AI & Embeddings), FAISS, PyPDF2

May 2024

- Built a Streamlit-based PDF chat application using Gemini-2.0-Flash and FAISS for semantic retrieval across documents.
- Implemented a RAG pipeline with PDF ingestion, Chunking, embedding generation, vector indexing and LLM-based Q&A.
- Designed a vector search workflow using Google embedding-001 and FAISS to retrieve relevant context for responses

Blog-Bloom | Python, Flask, SQLAlchemy, HTML, CSS, Bootstrap

April 2024

- Developed a full-stack blogging web application using Flask and SQLAlchemy with complete CRUD functionality for posts.
- Implemented user authentication and authorization, including registration and login.
- Created responsive user-friendly interface and paginated pages with Bootstrap for seamless content navigation.

Technical Skills

Languages: Python, Java, SQL, HTML, CSS

Database Technologies: PostgreSQL, MySQL

Frameworks: Flask, Django, Streamlit, React

Developer Tools: Git, Postman, Google Cloud Platform (GCP), VS Code, IntelliJ IDEA, Tableau

Libraries: SQLAlchemy, TensorFlow, Keras, OpenCV, Scikit-learn, Sentence-Transformers, Pandas, Matplotlib

Certifications

AI Agents in LangGraph | DeepLearning.AI

March 2026

Multi AI Agent Systems with CrewAI | DeepLearning.AI

April 2025

Applied Machine Learning | Coursera

Dec. 2023

Data Analysis with Python | FreeCodeCamp

Feb. 2023
